

Additional Sponsorship information for SUI2016

Introduction

The ACM Symposium on Spatial User Interaction (SUI) 2016 is the fourth international symposium focused on the user interface challenges that appear when users interact in the space where the flat, two-dimensional, digital world meets the volumetric, physical, three-dimensional (3D) space we live in. This considers both spatial input and 3D output, with an emphasis on the issues around interaction between humans and systems. The goal of the symposium is to provide an intensive exchange between industrial and academic researchers working in the area of spatial user interaction and to foster discussions among participants. Note that UIST will be starting from 16th October, 2016. UIST is the premier forum for innovations in human-computer interfaces and one of the biggest computer human interaction conference. Over 500 persons was coming to UIST2015. Even though one day cross-conference between first day of UIST and SUI, UIST participants might come to your place.

As the cutting edge conference in spatial user interaction research, SUI welcomes sponsorship from companies and organizations of all kinds. We are excited to offer our sponsors the benefits listed below, and to discuss specific needs and opportunities that further meet each sponsor's needs. An overview of sponsorship packages can be found on the conference website. This document provides further information about the conference participation opportunities, the site plan, available amenities, and the preliminary conference schedule.

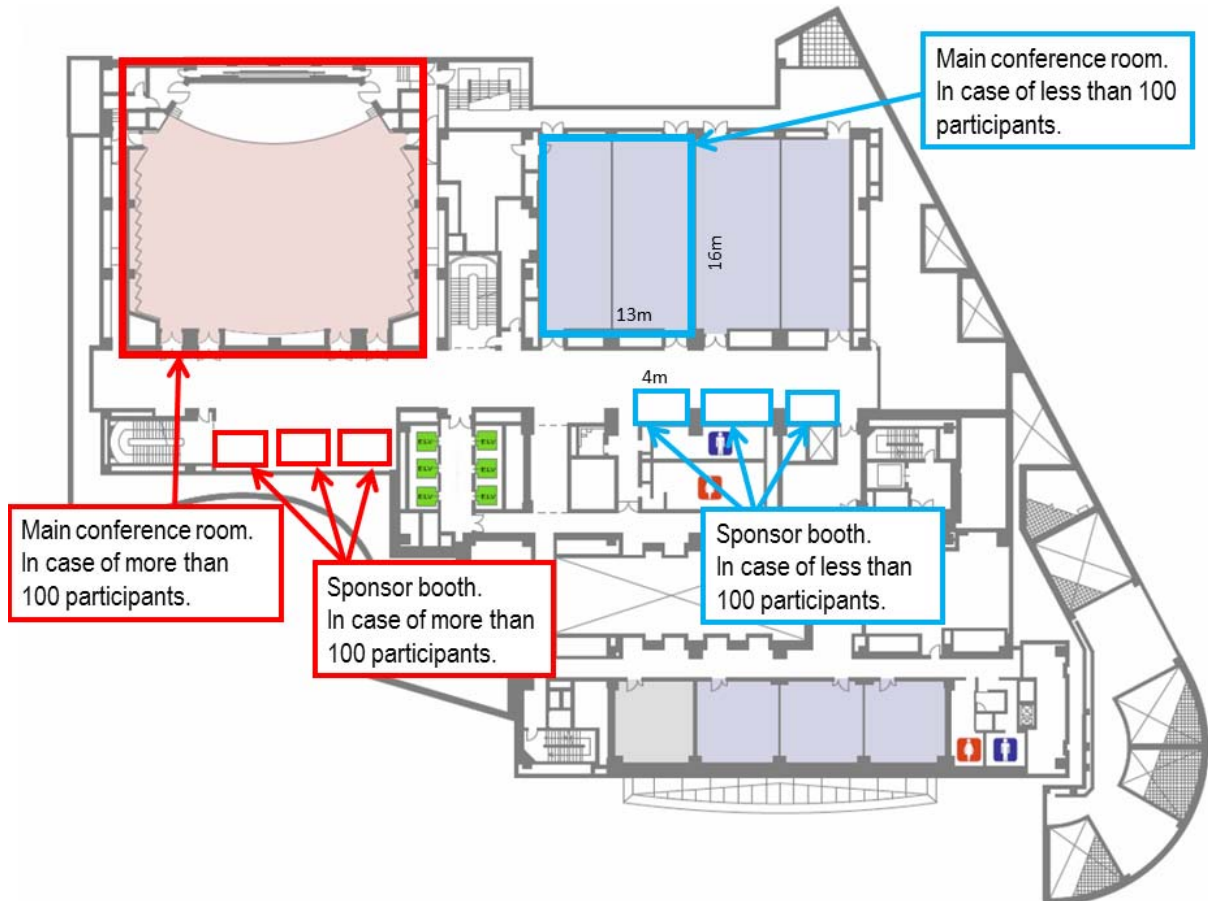

Conference Participation Opportunities

In addition to publicizing the participation by sponsors, we provide the opportunity to engage with conference participants.

1. **Space within the break areas.** Sponsors at the Silver level or above will have space in the break area outside the main presentation room. These are high-profile locations. There will be no dedicated security provided during conference hours, so sponsors are advised to keep the booth manned or take valuable materials with them when leaving.

Site Floor Plan

The conference will be held at Hitotsubashi Hall, Hitotsubashi University, Tokyo(2-1-2 Hitotsubashi, Chiyoda-ku, Tokyo) <https://goo.gl/xtPEzZ>

Basic booth equipment consists of W600 x H1500 long table, 2 chairs with upright movable notice board (W490 x H940 cm). Each table will provide a covering. Each booth will have one power strip. If you require wired internet, please request in advance.

Subject to the order in which they sign up and the level of support, each sponsor will have a choice of location for their booths. These will be put preferentially near the front entrance of the main conference room to ensure foot traffic. However, we are happy to work with sponsors to choose your preferred location.
